A CCNA IMPLEMENTING AND ADMINISTERING CISCO SOLUTIONS V1.0

The Implementing and Administering Cisco Solutions (CCNA) v1.0 course gives you a broad range of fundamental knowledge for all IT careers. Through a combination of lecture and hands-on labs, you will learn how to install, operate, configure, and verify basic IPv4 and IPv6 networks. The course covers configuring network components such as switches, routers, and wireless LAN controllers; managing network devices; and identifying basic security threats. The course also gives you a foundation in network programmability, automation, and software-defined networking.

Od	Do	Délka	Kód	Místo	Cena
10. 6.	**14. 6.**	5 dny	CCNA	Praha	**38 500 Kč**

A ENCOR IMPLEMENTING CISCO ENTERPRISE NETWORK CORE TECHNOLOGIES

The goal of this course is to develop the core networking skills needed to configure, troubleshoot, and manage Enterprise wired a wireless network. It also requires you to understand and implement security principles within the Enterprise networks and introduces you to overlay network design by using solutions like SD-Access and SD-WAN. The course also lays focus implementing on automation and programmability in Enterprise networks.

A ENARSI IMPLEMENTING CISCO ENTERPRISE ADVANCED ROUTING AND SERVICES

On this course you gain the knowledge you need to install, configure, operate, and troubleshoot an enterprise network and qualify for professional-level job roles in advance routing and services. This course will help you prepare for the Implementing Cisco Enterprise Advanced Routing and Services (300-410 ENARSI) exam.
